Deborra –

Thanks for your message. Let me confer with my division management about the most appropriate approach. I'm interested to know Bill Keener's thoughts, as well.

-Kathy

Subject: FW: Free the R.O.D. for Rosemont Copper - DRAFT RESPONSE - PLEASE REVIEW
Importance: High

Hi Kathleen,

You requested that the EIC Library staff (working under contract) respond to the one hundred or so form emails regarding Rosemont Copper which have been received in the general regional email box since mid-day yesterday. We can do this. Thanks for providing us with the text below to use.

Perhaps it would be better to use your name and position (and contact information?) or Carter's? I think it would be a better response from the agency if it came from the Environmental Review Office rather than the Regional Library.

So far Kerry has responded to 4 individuals. Going forward, because of prompt and creative help received from Richard Martin in IRM, we will be able to send an email once (or more times) a day to a group of senders whose names will be entered semi-automatically in the bcc: field of the outgoing response.

Notice, in the sample below, that the outgoing message shows Kerry Shoji's personal email address in the "from box". If it is decided that the response comes from your office (even though we do the responding) we can add a sentence under your signature, indicating that the response has been forwarded by Kerry, so that it is less confusing to the recipient.

I'm including Bill Keener of OPA in this email so that he too can provide input on this issue.

Looking forward to hearing from you,

Deborra

EPA Region 9

Dear EPA Region 9:

I've followed the Rosemont Copper project for a long time.

There are thousands of us who could write lengthy emails, rehashing the same facts that have been proven time and again.

But it's all been said, and you know the facts.

The costly and unnecessary delays are getting out of hand.

It's time to move forward with Rosemont. I urge you to help issue the Record of Decision without further delay.

Sincerely,

B6
